## DETAILED ACTION

### **Statement of Reasons for Allowance**

1.

The following is an examiner's statement of reasons for allowance: The prior art does not teach, disclose nor fairly suggest the claimed stable UV-photoprotective composition comprising the present feature of an oil-in-water emulsion obtained via the phase inversion technique in which the average size of the globules which constitute the oily phase of said emulsion ranges from 100 nm to 1000 nm and comprising inorganic nanopigments based on metal oxides and at least one organic UV-screening agent, said at least organic UV-A screening agent being 4,4-diarylbutadiene. The UV composition produces unexpected results attributable to said "phase inversion" technique.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
